Simple Car Game

This project is a simple car game created using basic HTML, CSS, and JavaScript. The game allows you to control a car moving forward. This project was developed after two weeks of learning web development. Some parts of the code are intentionally designed to work incorrectly as a joke with a friend. Please take this into account when reviewing the code.

Table of Contents

Introduction

This project is a result of two weeks of learning HTML, CSS, and JavaScript. It features a basic car game where you can control a car moving forward. The code includes some intentional bugs and humorous elements.

Features

- Basic HTML and CSS for the game's layout and styling.
- Simple JavaScript to control the car's movement.
- Intentionally incorrect elements for humor.

Installation

1. Clone the repository to your local machine:

   ```bash
   Copy code
   git clone https://github.com/Pawel-Tomczyk/simple_JS_progran.git
   ```

2. Navigate to the project directory:

   ```bash
   Copy code
   cd wyscigi
   ```

3. Open `index.html` in your web browser to start the game.

Usage

- Use the designated key "space" to move the car forward.
- Enjoy the simplicity of the game.r
